

Press Release

Curve of the Earth is a seven-song album released in December 2022. Recorded in Chongqing (People's Republic of China) and in Toronto, Brian Morgan's "new" album is a reflection on his "Ode to a Deaf Dog World Tour" and a year spent in China as an English teacher at the Sichuan Foreign Language Institute (1987-88). The album includes Chinese instruments such as a dizi (bamboo flute) and erhu (two-stringed violin) and a live performance of the traditional folk song Jasmine. Historical events such as the Cultural Revolution (Paint You with My Tears) and the life/death of Dr Norman Bethune (Bethune) are thematically featured alongside personal accounts of intercultural (mis)communication.

Curve of the Earth is distributed by CD Baby and is streaming on Spotify, Amazon Music, YouTube, and other music services (see <https://brianmorgan.hearnow.com>). Album credits, media coverage, a music video filmed in Chongqing, and Brian's music bio are all available at <https://brianmorganmusic.ca>
